

Show Images on Gift Receipts

Introduction

Introduced just in time for the holiday season beginning with **Edge version 25.2.1**, you now can choose whether or not images will print on Gift Receipts when previously images would always print by default. This behavior is controlled by the newly added “**Show Images on Gift Receipts**” System Option. Set the option to **True** to display images or leave as the **default False** to hide them.

NOTE

You have the option to still include images on a **per sale basis** when printing from POS using the new **Show Images on Receipt** checkbox located on the **Gift Receipts** window.

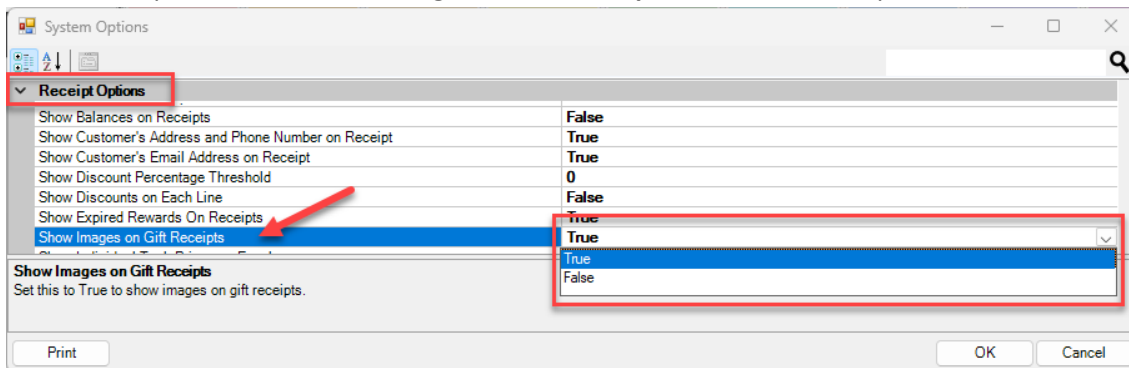

Setup

System Option

A **System Option** has been added giving you control over whether your Gift Receipts will print images by default. As mentioned, this option is set to **False** by default so images will not appear unless toggled to **True** manually.

To change the **System Option** to **True** to show images by default:

1. Click **Administrative > System Options**.
2. Scroll down to **Receipt Options**.
3. Locate the option named **Show Images on Gift Receipts** and click the dropdown arrow to select **True**.

Showing Images on Gift Receipts at POS

Giving you better control over whether images appear on a per-sale basis is the newly added “**Show Images on Receipt**” checkbox on the Gift Receipts window. This box will be **checked by default** when the System Option is set to **True**, and **unchecked** when set to **False**. You can **check** or **uncheck** the box to display images based on your customer’s needs at the time of sale.
